## Name That Cloud!

Here is your chance to show how much you know about cloud types (and also to earn a couple bonus points)! A slide show of 15 clouds will scroll on the main screen for approximately 5 minutes. Next to each of the numbers below (1 – 15), identify the type of cloud shown in the picture and what the cloud is composed of. To gain some bonus points, identify any optical effects seen in this photo. Print clearly – if we can't read it, you don't get points. Good Luck!

	<b>cloud name</b>	<b>cloud composition (water, ice, mixed)</b>	<b>type of optical effects present, if any</b>
